BLACK MAGIC!

This is a very simple & straightforward piece of mind-reading. You won't need anything except a very simple method. The trick looks like this: you ask a friend to privately think of a random object nearby or on a table. They tell you & only you. Next, you invite your other friend over and explain the game you're playing. You then begin asking your friend if a variety of random objects is the one your first friend is thinking of. He/she says no, no, no and finally when you pick up or point to the actual item the person is thinking of, your friend knows immediately that it is correct! This trick uses no hand gestures, raises or changes in voice tone or volume and nothing other than a very simple code.

Here's how it works:

Your second friend is in on the trick. But that is only part one. You and your friend have discussed prior to the trick that the correct item person 1 is thinking of will be named **AFTER** an item that is **BLACK** in color. It goes something like this: (let's say the item the first person is thinking of is a salt shaker)

MIND READER: Is the item she is thinking of this bottle of ketchup?

PERSON 2: No, it is not the ketchup.

MIND READER: Is it the fork?

PERSON 2: No.

MIND READER: Is it this (black) tablecloth?

PERSON 2: No.

MIND READER: Is it the salt shaker?

PERSON 2: YES!

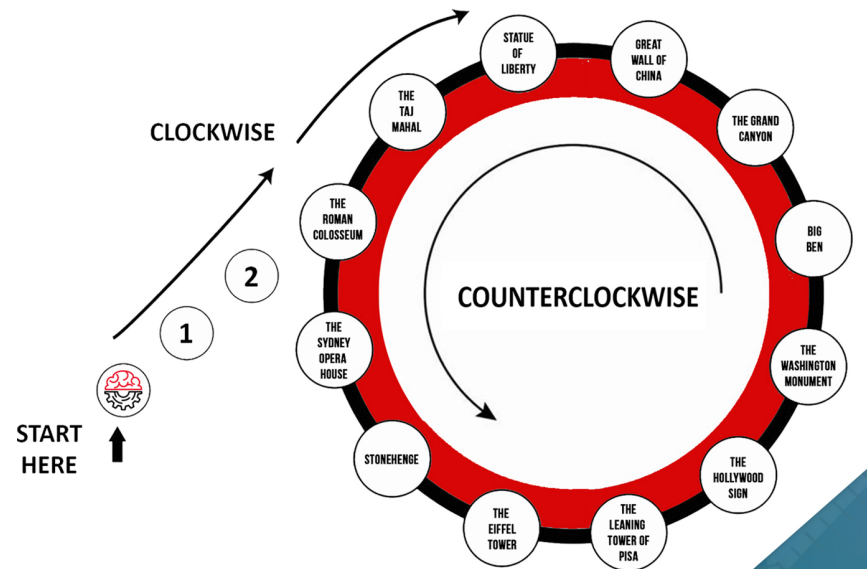

Just name the chosen item after an item that is black in color & you've just read someone's mind! You can even do it again, naming things in a different order to convince people you're not just naming the right item on the 5th turn. Your second friend can even be blindfolded or facing the other direction to dissuade those from thinking you're using a visual cue.

The MATHEMATICAL MIND READER!

This very fun, self-working trick is super easy to learn and will amaze people! You'll be able to accurately predict exactly where a person lands on this game board with 100% accuracy. Ask your friend to think of a number between 5 & 15. Starting on the start circle, have them privately count that many spaces clockwise around the circle. Next, have them reverse direction and count the same number counterclockwise. When they get to that final circle they are to remember the landmark. Their choice will **ALWAYS** be in the 8th position after the top most arrow-head. **Always.**

You can change this up and put anything in the 8th position. Names, places, dates, whatever you want. As long as you follow the instructions the final chosen circle will be 8th!

SOME QUICK PSYCHOLOGICAL TRICKS!

3

1. ASK SOMEONE TO THINK OF A NUMBER BETWEEN 1-4. THE ODDS ARE THEY WILL PICK THREE!
2. ASK SOMEONE TO IMAGINE THEY'RE LOOKING OUT A WINDOW & TO THINK ABOUT WHAT THEY SEE. THEY WILL ALMOST ALWAYS BE THINKING OF A TREE OR CAR!
3. ASK SOMEONE TO THINK OF THE FIRST FLOWER OR WILD ANIMAL THAT POPS INTO THEIR HEAD. THEY WILL ALMOST ALWAYS BE THINKING OF A ROSE AND A LION!

"Don't do all of these at the same time. Pick one, max 2 and be very casual about it!"

Get Chris' Hit Book

"You Can Read Minds!" Which is **ONLY** available at Chris' live or virtual events. This fun & unique read will teach you a dozen incredible mind reading tricks to fool your friends, break the ice at a party and generally just be awesome! Also, the chosen card will be the nine of diamonds. Included are 12 tricks (that are easy to learn) and extra bonuses!
